TECHNICAL INFO:

Ferment occurred in stainless steel, with temperature monitored to ensure a controlled ferment with a focus on this varietal single vineyard. Open pump overs twice daily. A natural strain of MLF bacteria was introduced post yeast inoculation in order to bed the wine down for early release. Pressing occurred at dryness, the wine was racked off gross lees and bedded down for 2 months with 15% of the wine being exposed to older oak for structure and balance, while ensuring the berry flavours could sing!
